

# Give Life Center wishes to apologise for any distress that their recent Fax caused to recipients.

We felt that the hard impact of an Angel standing over the coffin and giving CPR would have a positive aspect relating to first aid. We hear regularly that people wished that they had done a first aid course because of an injury to a child, loved one or work mate. They state that they now felt better knowing that they can make a difference and not feel powerless to help.

**We do however hope that you will invest just a few minutes going to our website and seeing the new free instructional videos we have put up there and hope we see you at one of our world class training sessions soon.**

**Life is precious.**
